Applicant's amendment dated February 15, 2008, has been fully considered.

Applicant has amended claim 1 to overcome the previous rejection. However, a new ground of rejection has been made based on a newly discovered reference from further searches. This Office Action has been made non-final.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-9, are rejected under 35 U.S.C. 102(b) as being anticipated by US 6249057 (Lehet).

Lehet discloses an energy conversion apparatus comprising an upper housing 532 acting as the first magazine, a lower casing 160 acting as second magazine, a pair of rotating disks 208, 210, located at the area of said housings 532, 160, a chain for connecting said disks 208, 210, and using tidal wave (buoyancy force) inside chamber 16 to drive the sails 120, because Applicant stated in his remark of the amendment that his "sails" can be either solid or flexible, elements 120 can be considered as "sails".

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3748

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 6249057 (Lehet). Lehet discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose the hinge shaft. However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to select different types of connecting means including the hinge shaft for the sails in Lehet for the purpose of providing flexibility at the connections.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Examiner Nguyen whose telephone number is (571) 272-4861. The examiner can normally be reached on Tuesday--Friday from 12:30 AM to 10:00 PM.
